3. How are the various systems used by the ETKA, ETOS, and ElsaWin? How are they different? Why is there so much similarity between the three programs? What might be the best features of each program? 4. For a standard, three-spark gasoline-fueled car, which program would you recommend? Why? What type of performance would you expect from a more advanced program? 5. The BMW M3 is a VAG car and, as of 2012, the most powerful sedan that BMW produces. It is not only the most powerful car in its class, but also the most powerful sedan in the world. How does this affect your choice of ETKA? Why? 6. What is the purpose of the BMW M3 Performance Package? How would you benefit from this feature? 7. What might be the consequences of not having an EPCS program installed? 8. The Audi TT has the distinction of being the first sports car to be named a Car of the Year. Audi is also the first automobile manufacturer to offer the most powerful performance package

available from the manufacturer. Audi produces four- and six-cylinder cars; and there are two engine options: a 2.0-liter 16-valve four-cylinder and a 2.5-liter 32-valve four-cylinder engine. Audi markets its performance package as a "Roadster Package" to differentiate it from the Audi S, an Audi model with sport-car performance characteristics. Discuss the various features of the Roadster Package, the enhancements that Audi makes to this package, and the performance characteristics that are provided by the Audi S as an alternative to the Roadster Package. 9. How are the features of the Audi S and the Roadster Package different? 10. The Mercedes-Benz E63 AMG is the most powerful road-going sedan ever produced by Mercedes-Benz. In 2012, the factory AMG engineers developed a new type of supercharger for the E63 AMG. This new type of supercharger uses a twin-injection system to achieve fuel-efficient combustion. What are the benefits of this technology? 11. What would you expect from a Mercedes-Benz E63 AMG with this new type of supercharger? What would you expect from a Mercedes-Benz E63 AMG that is not equipped with the new twin-injection technology? 12. Discuss how Mercedes-Benz f3e1b3768c
