It's better to download the files individually as mentioned. I don't really understand why I cannot install the software with the Windows 7 program either. Any help would be appreciated. A: One of the components of the "Software Downloads" page is actually the installer of the application, and it installs the software in a directory on your computer (e.g. C:\Program Files\Telemecanique or C:\Program Files (x86)\Telemecanique). The same "Software Downloads" page contains also the installer of the Telemecanique software for Windows, which installs the same software in a different directory (e.g. C:\Program Files\Telemecanique). The installer of the Telemecanique software for Windows has its own "installer.exe"
