Category:Languages of Telangana Category:Telugu dialects Category:Karnataka language Category:Kannada language Adenoviral overexpression of HSP27 inhibits OA-induced chondrocyte hypertrophy and extracellular matrix changes. Osteoarthritis (OA) is a common musculoskeletal disease. It is characterized by slow, progressive degeneration of articular cartilage, resulting in joint space narrowing, pain and impaired function. Hyaline cartilage specific heat shock protein 27 (HSP27) has been shown to modulate several chondrocyte functions such as proliferation, differentiation and matrix synthesis. We investigated the effects of HSP27 overexpression in OA chondrocytes on cell growth, apoptosis, cell matrix synthesis and matrix degradation. Murine OA chondrocytes were infected with adenovirus encoding HSP27 or GFP. HSP27 overexpression decreased chondrocyte hypertrophy and reduced the extracellular matrix changes normally associated with OA. In vitro co-culture of HSP27 overexpressing chondrocytes with OA chondrocytes showed that HSP27 overexpressing cells were able to inhibit cell death in co-cultured cells. Our results suggest that HSP27 is involved in OA chondrocyte hypertrophy and extracellular matrix alterations.

2300 things to do on your summer vacation in Amsterdam Amsterdam is probably the city you've always dreamt about living in. After years of scouring the city for great hotels, it finally all came together for us. It's a place of extremes, where it's hard to know whether to love or loathe the city. It's a haven for tourists, but at the same time a city with a vibrant nightlife. And I mean that in both a literal and a figurative way. The city is covered with bridges, both old and modern. You can take the famous footbridges over canals or go on the water, and the view is fantastic. The city centre is all cool brickwork and historic buildings. It's at its best during the tulip time (October to March) and at night the lights from the Amsterdam canal boats really add to the magic. The main attraction for many is the red light district. 2d92ce491b
