Text At the core of the operation of the 'CAD' application lies an extensive text engine which performs processing on text strings in real-time. It allows for text editing and object insertion. The types of objects supported are: 2D lines, 2D polygons, text, 2D shapes, 3D shapes (polylines), 3D line networks, 3D solid objects, surfaces, 2D and 3D text objects, 2D and 3D text objects provide a variety of properties that enable applications to work with the text as it is displayed. These properties include: Text features 3D text features Text frames Text alignment Text justification Text auto rotation Text rotation Text rotation lock Text styles Text size Text effects Text borders Text box 3D text Auto-text Auto-text brush 3D text tooltips Text/shape functions The Text/Shape functionality allows for operations such as text addition, deletion, paste and combinations of those.
